

# EVENING AURORA PURSUIT.

## JOIN US IN SEARCH OF THE COSMIC AURORA BOREALIS.

You've never seen a light show like this before—aurora borealis, the northern lights. Magnificent greens, purples, and reds dance across the night sky, but only in certain seasons at certain latitudes.

The subject of art and mythology throughout history, auroras appear when solar winds disturb Earth's magnetosphere, causing charged atomic particles to glow. Translation: They're beautiful.

Join us on an excursion in search of the aurora. We'll take a short drive into the hills around Fairbanks, away from city lights, for an unobstructed view. People from around the world come here because the area offers such great opportunities to catch the show.

Along the way, we'll enjoy light snacks and hot beverages. Experience this optional excursion for just \$100 per person.
